Education

Mirza Ghalib college affiliated by Magadh University — Bihar, India
Bachelor of Computer Application — *Aug. 2023 – Jul 2026*

Experience

Drape AI — Feb 2026 – Mar 2026
Remote - (2 months) — *Frontend Developer Intern*

- Designed and refined responsive landing page flows for an AI-powered product imagery platform across mobile and web.
- Improved visual consistency by establishing clear spacing, typography, and component patterns across key sections of the interface.
- Worked closely with the product lead to iterate on UI based on feedback and translate requirements into polished, production-ready designs.
- Contributed to key sections including hero layouts, product workflow steps, pricing, FAQ, comparison tables, and final CTA flows.
- Created interactive UI experiences using motion design and Lottie-based animations to make the product feel more polished and engaging.

Projects

SocialX | *AWS S3,Next.js,CRON Job,Instagram Grah Api, Node.js, MongoDB* — May 2025

- Built a social media scheduling app where users can create, schedule, and auto-post their content with media attachments.
- Integrated with the Instagram Graph API (Facebook) to manage media uploads and publishing.
- Developed a custom backend API with JWT authentication, smart error handling, and automatic retries.
- Used AWS S3 to store scheduled data and media; automated publishing using CRON jobs.
- Designed a Next.js dashboard where users can track both successfully posted and failed scheduled posts.

Ice Tea | *Next.js, VS Code Extension, TypeScript, Design Systems* ***View Live*** — June 2025

- Designed and published an anime-inspired VS Code theme with pastel tones and clear contrast for better readability.
- Reached **40+ installs** on the VS Code Marketplace with positive developer feedback.
- Used Next.js for the landing page and documentation website of the theme.
- Actively maintained and improved the theme, with plans to release more variations and accept community suggestions.

Polaroid | *Next.js, TypeScript, Tailwind CSS, Framer Motion,Html Canvas* ***View Live*** — Dec 2025

- Built a Polaroid-style web app that lets users create aesthetic photo layouts with smooth animations and a clean UI.
- Used modern frontend tooling (Next.js + TypeScript +Html canvas) for performance and scalability.
- Adopted by 140+ users, with positive feedback on usability and visual design.
- IndexedDB to persist user history, ensuring changes remain intact even after users leave or reload the app.

Technical Skills

Languages: Java, C/C++, JavaScript, TypeScript, HTML/CSS
Frameworks & Libraries: Next.js, React, Node.js, Express.js, Tailwind CSS, Bootstrap
Databases: MongoDB, Firebase (Firestore), PostgreSQL
Cloud & DevOps: AWS, Firebase Auth, Nebius Cloud, CRON Jobs
APIs & Tools: Instagram Graph API, Open Food Facts API, Twilio SMS, Axios, Postman, JWT Auth
Developer Tools: Git, VS Code, IntelliJ IDEA, Dev C++
